

Leadership Conference on Collaboration Talk Synopses 2nd November 2016

Doors open at 8.00am for an 8.30am start. The day ends at 3.45pm

Speaker	Talk
Dr Richard Kazbour, Harkera	A Scientific Safety Strategy Richard will review the science of leadership's importance in the big picture of safety, and the importance of creating a reinforcing environment for leading measures instead of a punishing one for lagging results.
Howard Lees, Hollin	The Fall and Rise of Behavioural Safety Howard will provide a review of behavioural safety over the last 10 years and some insights as to how people can move safety from its current place to something more enlightened and useful.
Chris Pike, Arcadis	Safety By Design Chris will discuss various ways to affect safety through design using behavioural principles.
Craig Reade, Costain Atkins Black & Veatch JV at eight20	Leading Safety Craig will discuss what leaders have to do to get from virtual to real safety.
Allison Reynolds, Science-Based Leadership	Data-Based Decision Making Allison will share the latest thinking on how organisations are starting to use real time behavioural sampling to manage safety, and offering some examples.
Bruce Faulkner, 3 Simple Rules	Tactical Hell or Strategic Heaven - Which are you in? If strategy is the art of getting results, of putting ideas into practice, then how are you doing? Carrying business as a badge of honour might be the first clue. Managing the immediate problems with a degree of aplomb might be another clue. You know what hell feels like, heaven doesn't feel how you imagine.
